

PHANCY

BRAND IDENTITY GUIDELINES

A compact visual system for a financial brand built around a house-shaped P monogram.

Built from the idea of home.

The logo combines a P monogram and a roofline - a direct link between finance, property and a sense of security.

P + HOME

The identity is deliberately simple. The roofline gives the mark a familiar cue; the rounded P keeps it approachable rather than institutional.

DESIGN INTENT

DIRECT

APPROACHABLE

CONSISTENT

Logo construction

The symbol is one locked composition. The roofline, curve and vertical stem should never be redrawn independently.

- 01 Keep the roofline locked to the monogram.
- 02 Maintain a single visual stroke weight across the symbol.
- 03 Use the full wordmark when the brand name needs to read immediately.

Approved versions

Choose the version with the strongest contrast. These four cover the intended light, brand-colour and dark-background uses.

01 / BLACK ON LIGHT

02 / WHITE ON PINK

03 / PRIMARY

04 / WHITE ON DARK

Clear space & scale

Clear space is measured from the chimney width (x). Keep at least 1x around the full mark and symbol.

DIGITAL

180 px

full logo

32 px

symbol

PRINT

35 mm

8 mm

symbol

PROTECTED AREA

A small palette, used deliberately.

Pink carries recognition. Black carries structure. White and soft neutrals create room around the information.

PHANCY PINK

#FFA1CF

INK

#111116

WHITE

#FFFFFF

SOFT BLUSH

#FFF5FA

WARM GREY

#F7F4F1

USE PINK TO LEAD THE EYE - NOT TO FILL EVERY PAGE.

Typography should disappear behind the information.

Recommended system: Lato for clean hierarchy and reliable digital readability.

HEADLINE

Lato Bold

SUBHEAD

Lato Semibold

BODY

Lato Regular

Make the next step clear.

Numbers and financial information should be easy to scan. Keep sentences short, use generous spacing and let one key figure lead each section.

One grid, many formats.

The system uses strong left alignment, wide margins and a limited number of vertical divisions. The same logic scales from documents to social posts.

MARGINS

48-64 px

Keep edges quiet.

ALIGNMENT

LEFT

Use centred type only for small lockups.

SPACING

8 PT

Build spacing in simple multiples.

Borrow shapes from the logo, not decoration.

The roof angle and P-curve become secondary devices for crops, separators and motion cues. They should support the composition, never compete with the mark.

ROOFLINE

Use the angle to frame content, create section breaks or crop photography.

P-CURVE

Scale the curve up. It works best as a directional shape rather than a small motif.

Social applications

Application examples use the same logo scale, type hierarchy and colour balance. Each layout is built around one message.

Documents & presentations

For reports and proposals, the visual identity should organise information rather than decorate it.

FINANCIAL OVERVIEW

DOCUMENT COVER

01 / SNAPSHOT

Simple numbers.

Lead with one key metric.

64%

clarity first.

One figure, one headline, one next step.

PRESENTATION COVER

The final check.

Before export or handoff, run through these six rules.

LOGO

Use an approved version.

SPACE

Keep 1x clear space.

COLOUR

Pink is an accent.

TYPE

Keep hierarchy simple.

SHAPES

Use roofline + P-curve.

TONE

Direct and approachable.

DO

Keep proportions / preserve contrast / leave space

DON'T

Stretch / recolour / add shadows or effects
